## ENERGY SOURCE

### ENERGY STORAGE & FLEXIBILITY

Energy Source works with a solution to reduce, reuse and recycling Lithium Ion Batteries and through their green solar lamp they can store the electricity to provide lighting everywhere.

#### Technologies

Internet of Things, Artificial Intelligence/ Machine Learning, Hardware Optimisation, Solar Energy, Renewable Energy

#### Website

[energysource.com.br](http://energysource.com.br)

#### Country of Origin

Brazil

#### Stage

Product ready with paying customers

#### Year of Birth

Aug 2017

**David Noronha**  
CEO

### WHAT'S DIFFERENT?

Energy Source is the first one to offer to the global market a complete solution to reuse and recycling lithium ion batteries. Last year they imported some machineries and improved their collecting process. Now combining both automatisation and good quantity of raw material and the implementation of the lean manufacturing process with high quality control

### BUSINESS MODEL

Energy Source has two different businesses inside the company, the first one is Second Life Product, that they supply the market since 2017 with stationaries batteries, having a solar lamp as the newest product. The 2nd business is recycling, still in lab stage, they registered the patent of this process and the next step is to start a pilot plant.

### INVESTMENT

**Raising:** Yes

**Stage:** Series B
