PLATAFORMA VERDE

SMARTER GRIDS

PV can control all of the environment's KPI's in the generation and distribution point of view. They can also control the discarded materials during the lines maintenance.

Technologies

Blockchain, Advanced software (e.g. assets optimisation, data management), Automations, robotics and liquid computing

Website

plataformaverde.com.br

Country of Origin

Brazil

Stage

Scale-up

Year of Birth

Aug 2016

Chicko Sousa
Founder

WHAT'S DIFFERENT?

PV's entire software was assembled in a network format, where the inputs are shared between the entities in the chain and not repeated. Besides that, they map the entire productive chain, providing a more strategic insight to clients. They have protection in place for IP.

BUSINESS MODEL

They currently market the subscription for modules of Plataforma Verde and also from projects developed with clients that help build marketable functionalities and improve the product.

INVESTMENT

Raising: Yes

Stage: Series A
